Education

FOM University of Applied Sciences

M.Sc. in Big Data and Business Analytics | Grade: 1.9

April 2024 – February 2026

Essen, Germany

University of Mumbai

B.E. in Electronics & Telecommunication Engineering | Grade: 2.2

June 2019 – May 2023

Navi Mumbai, India

Technical Skills

Analytics & Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), Advanced SQL, R, ETL Pipelines, Statistical Analysis

BI & Visualisation: Power BI (DAX, Data Modelling), Excel (Power Query, Pivot Tables), Dashboards & KPI Reporting

Data Analysis: Exploratory Data Analysis, RFM Segmentation, Time Series Analysis, Trend Forecasting, Correlation Analysis

Tools & Systems: Jupyter Notebook, Git, ACL Analytics, Automated Reporting Pipelines, MS Office

Experience

Data Analyst | Satori Group India

Navi Mumbai, India

June 2023 – February 2024

- Engineered end-to-end analytical solutions using Python, Advanced SQL, and Power BI, cutting reporting cycle time by ~20% across multiple concurrent client engagements in a high-paced consulting environment.
- Architected interactive dashboards and automated reporting pipelines; translated ambiguous business requirements into well-defined KPI frameworks, enabling real-time stakeholder decision-making across cross-functional teams.

Python Developer Intern | Source Catalyst

Navi Mumbai, India

February 2023 – June 2023

- Built and maintained modular Python applications serving 200+ active users, automating repetitive data-processing and file-handling workflows to boost operational efficiency and cross-platform scalability.
- Contributed to agile sprint cycles with Git-based version control, code reviews, and end-to-end feature delivery across Android application workflows.

Projects

German Labour Market Analysis 2012–2021 |

May 2026

- Analysed 568,480 official unemployment records from Bundesagentur für Arbeit across 401 German districts and 145 occupational groups; identified a 15.7% national improvement from 2012–2019 followed by an 18.4% COVID-19 spike in 2020, quantifying pandemic impact on German labour markets.
- Conducted East vs West Germany comparative analysis revealing East Germany's 26% unemployment reduction vs West Germany's 7% increase, driven by NRW structural unemployment and differential COVID exposure in service sectors; delivered targeted policy recommendations for federal employment programmes.
- Key Tools:** Python, Pandas, Matplotlib, Seaborn | **Source:** Official Bundesagentur für Arbeit data

Customer Analytics — RFM Segmentation |

March 2026

- Built a complete customer segmentation framework on 1M+ retail transactions using RFM analysis (Recency, Frequency, Monetary scoring) and K-Means clustering; identified 6 actionable customer segments including 4 VIP whale customers generating £1.7M revenue, proving the 80/20 rule with Champions (22% of customers) driving 74% of total revenue.
- Quantified a £494,723 revenue recovery opportunity through targeted retention strategies for At-Risk and Lost customer segments; delivered segment-specific business recommendations covering loyalty programmes, win-back campaigns, and new customer onboarding sequences.
- Key Tools:** Python, Pandas, Scikit-learn, Matplotlib | **Dataset:** 1,067,371 transactions, 5,878 customers

- Conducted longitudinal analysis of 6 years of FMCG sales data across 5 flagship products (Merci, Werther's Original, Toffifee, Knoppers, Riesen) using regression and Random Forest models; identified Oct–Dec seasonal spikes and marketing spend as the dominant sales driver (>50% feature importance).
- Delivered data-backed sales forecasting models (R^2 : 0.60) and Power BI dashboards supporting commercial planning and inventory optimisation; provided actionable recommendations for budget allocation timing, trend index monitoring, and long-term brand health tracking.
- **Key Tools:** Python, SQL, Power BI, Excel | **R^2 : 0.60, 6 years FMCG data, 5 products**

Publication

- **Digi-Farming Assistant for Soil Quality Analysis** | 
IEEE ICAISC 2023 | A. Banerjee, S. Mahajan, **A. Rathore**, S. Shirture, M. Rajput
Developed an IoT-based smart farming assistant integrating soil quality sensors with machine learning for real-time agricultural decision support.

Certifications & Languages

- **Certifications:** DILIGENT ACDA – Level 3; BE10X AI Tools – Completed
- **Languages:** English (C1 - Advanced), German (A2 - Elementary), Hindi (C2 - Native)
